Kindling: Print-and-Play for Indie Designers

Turning prototype chaos into a streamlined workflow.

PROBLEM

Prototyping eats designers' evenings

- Manual layout leads to mis-aligned cards and boards.
- Playtest notes are scattered across emails and PDFs.

SOLUTION

A ready-to-print kit and feedback sorter

- Templates print perfectly on any home printer.
- Digital form auto-categorises tester comments.

MARKET

Thousands of solo board-game creators worldwide

- Growing indie game scene fuels demand for low-cost prototyping.
- Kickstarter launches show a steady rise in first-time designers.

TRACTION

12 beta users in twelve weeks, 2 already paying

- Beta users grew from 2 to 12 since 6 July.
- Two designers pay €39 a month: €78 MRR.
- 40 playtest sessions run on the kit so far.

TEAM

Founder runs design and development

- One-person team combines board-game design with software skills.
- Directly understands user workflow and pain.

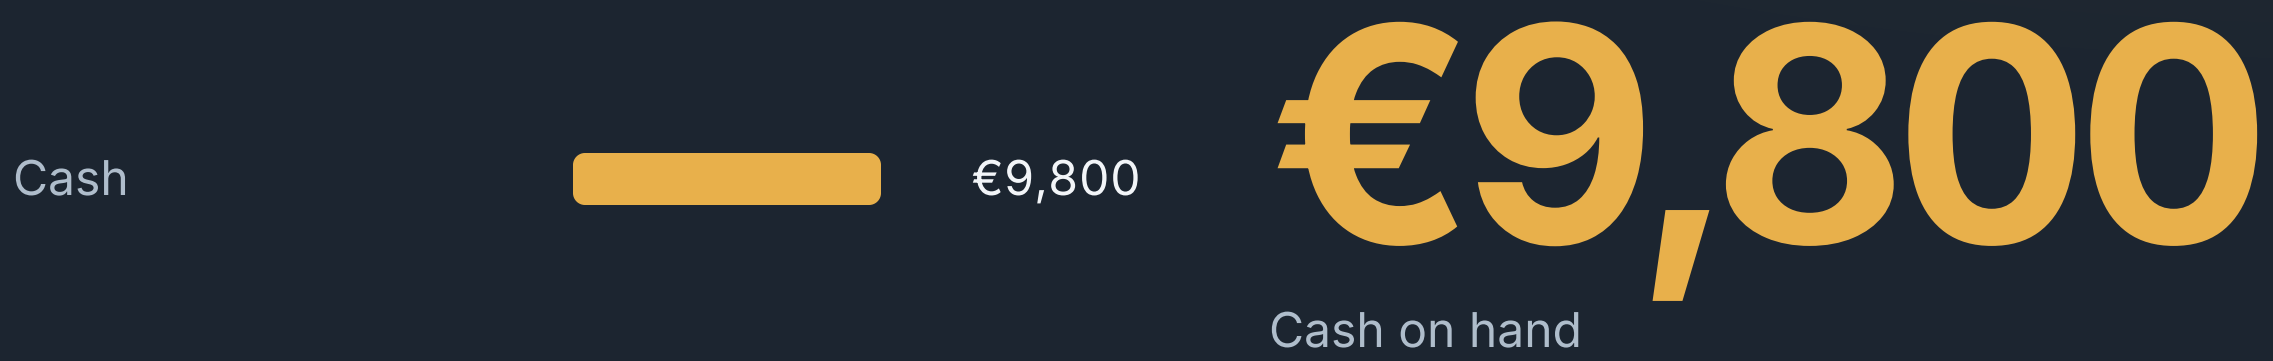

THE ASK

Seeking a small angel round

- Funding will accelerate feedback-sorter development and expand template library.

QUOTE

> "Kindling lets me print a playable prototype fast."

— Beta user, indie designer

LIST

Next milestones for the next 6 months

- Launch feedback sorter to all beta users.
- Add five new template packs.
- Reach five paying customers.
